Enalasy Corporation, the world's largest provider of automated diagnostic verification services, recently appointed Luke Hermann to the position of executive vice-president of sales & marketing.

Hermann has an extensive background in HVAC and energy savings construction, business development and performance contracting consulting. His

Luke Hermann

experience ranges from ownership and management of medium—to large size performance contracting HVAC companies to mergers and acquisitions of profitable HVAC companies for public HVAC entities. Enalasy's California Energy Commission approval as a Third Party Quality Control Provider has launched an extensive demand for Enalasy automated diagnostic verification solutions for the 14,000 HVAC contractors in the state from which Hermann will be directing the contractor membership expansionary growth.
